Product Description

The A12 is an electron microscope that manually adjusts the focal length. It has two magnifications of 200X/1000X, which is light and stylish, making it easier and more convenient to observe tiny objects. The camera has 200W pixels, making the quality of taking photos higher and clearer. It is equipped with a 2.4 IPS screen, making the picture soft and delicate. Large capacity batteries allow the device to work longer. It is a perfect science, education/entertainment product.

FAQ

1. This product is only supported for children over 36 weeks. Children cannot be eaten or beaten violently.
2. In order to protect the T-card from being damaged, try to shut down the TF card before inserting it. (Note: Formatting will delete all data on the memory card, please remember to back up in time)
3. The surface of the object being observed should be as smooth as possible to ensure a clear image.
4. Please do not touch the lens and other optics with your hands, as this may cause blurry images and affect image quality.
5. Do not disassemble the product or its components to avoid the use of the equipment.
6. If the device is turned on, there is no operation after 5 minutes, it will automatically shut down. You need to unplug it back to the switch gear and then start it up.

Instructions

As shown in the figure, it is turned off.

(Note: Pull it to the middle or the rightmost side is the power-on state. If the device is not operated for 5 minutes, it will automatically shut down. If you need to start the device again, you need to pull it back to shut down before you can turn it on)

   Short press to view forward (photo/video)

Instructions for use

Please use with TF card to ensure sufficient storage capacity for taking photos/ videos.

Charging/Data Reading

Insert the data cable to connect to the PC, and it will prompt whether to charge or read data(Support 5V/1A adapter charging)

TF card can also be inserted into PC to read photos and videos.

Specifications

Input voltage:5V/1A	Rated voltage:3.5V-4.2V
Maximum power:0.8W	Fill light:8 pieces
Display screen:2.4-inch IPS	Magnification:200X&1000X
Charging interface:Type-C	Battery capacity:1000mAh
Camera pixel:200w	Photo/Video Format:JPEG/AVI
Photo resolution: 1920*1080	Video resolution: 1280*720
Docking Dock:Supports up to32GTF cards	

CC Statement

Any change or modification not expressly. Approved by the game responsible for compliance could cancel the user authority for operate the equipment.
This device complies with part 15 of the FCC rules.
The operation is subject to the following two conditions:
(1) This device cannot cause harmful interference,
(2) This device must accept any interference received, including interference that Maycaus does not wish to work.

CC Radiation Exposure Statement:
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

WEEE Compliance

- correct elimination of this product (electrical equipment waste and electronic) (applicable in countries with collection systems separated)
- This marking on the product, accessories or literature indicates that the product and its electronic accessories should not be eliminated With other household waste at the end of their professional life.
- to avoid possible environmental or man, health from elimination that is not controlled by waste, please separate these elements from other types of waste and recycle it from responsible for promoting the sustainable reuse of material resources.
- Household users must contact either the retailer where they have bought this product, or their local government office, for more than details where and how they can take these articles for a environmental recycling. Professional users must contact their supplier and check the terms and conditions of Purchase contract.
- This product and its electronic accessories should not be Mixed with other commercial waste for elimination.

THANKS!
